JOHNSON SYSTEMS INC. FILES TWO PATENTS

Two Patents filed with the United States Patent and Trademark Office

CALGARY, Alberta, September 29, 2017– JOHNSON SYSTEMS INC. (JSI), an archtainment lighting control company, announced today that it has filed two Provisional Patent Applications with the US Patent Office for its **Presidor™ LED Dimmer** and **Presidor™ Lighting System Controller**.

*“Filing these patent applications today represents the culmination of 10 years of R&D. With our IP protected, this allows us to showcase **Presidor™** to a few key industry professionals to both test the appetite of the market as well as receive invaluable feedback towards the final development”, says founder and CEO Shaun Johnson.*

Presidor™ will provide a ‘next generation’ solution for customers wishing to easily and quickly upgrade their existing lighting to energy and cost saving LED’s at a fraction of the cost of new installations. This ultra green, extremely energy efficient (99.75%) control system is expected to be introduced to the world at the October LDI 2018 trade show in Las Vegas, Nevada.

For over 30 years, Johnson Systems Inc. has provided state of the art, retrofit lighting solutions to museums, auditoriums, theatres, conference centres, theme parks and more.
